Re: New CofE resources to support schools to cut carbon

Thursday 14 March 2024

To: All headteachers, school business managers and chairs of governors of church schools in the Diocese of Gloucester

Dear colleague,

Following the recent live webinar led by the Church of England Education Office which promoted free and new resources for schools I am pleased to include the following links to resources as well as the recording of the webinar.

- **Understanding your footprint-** using the [Count Your Carbon](#) Toolkit provided by [Eco Schools](#) - an interactive tool to help you lower carbon emissions in your school
- **Quick wins** - find out some easy wins to reduce your school's carbon emissions using the [Practical Path](#) checklist
- **Know Your Building Better** – access a new [Building and Energy Self Audit tool](#) & [Heating Resilience Plan](#) designed to help you begin your net zero carbon journey
- **Access support** – from [Ashden Climate Action Advisers](#) to help your school start its net zero journey

You can access the recording and future webinars here: [Net Zero Carbon Schools | The Church of England](#) (in a link under 'Inspiration' section and also at the bottom with full screen video) and via [Webinars on getting to net zero carbon | The Church of England](#) (under 'past recordings').

All the documents and further information are available via the Church of England website: [Net Zero Carbon Schools | The Church of England](#)

I will contact you all again through the DEN, Illuminate, e mail and site visits with additional support and provide you with some strategies on how to make best use of these resources in a practical and sensible way.

If you have any queries at this stage, please let me know.

Regards

David
